

**Rosland Capital is the latest customer for exclusive, custom legal tender coins from MTB and PAMP.**

We work with a number of precious metal dealers around the world to create exclusive, custom legal tender coins. While we never play favorites, we're happy to present products that highlight the well regarded and innovative skills for which PAMP SA is world famous.

The Lady Liberty series is a great example, minted by PAMP for [Rosland Capital](#). PAMP is always attracted by projects where they can utilize their artistic talents to the best advantage. [Rosland Capital is a precious metals provider](#) based in Los Angeles, California, specializing in premium coins and in [gold IRAs](#).

Three different designs in the Lady Liberty series were created and we think they look just beautiful. As a New York-based company, MTB naturally has a great fondness for the world's favorite statue and universal symbol of freedom.

### **Obverse**

Portrait of Queen Elizabeth II by Ian Rank-Broadley, with frosted finish on proof-quality mirror background.  
25 Dollar denomination; 2016 mintage; issued by the Solomon Islands under the administrative supervision of the Royal Australian Mint, an Australian Government institution.

For reference, The Solomon Islands is a member of the British Commonwealth, the United Nations and the International Monetary Fund. Its head of state is Queen Elizabeth II. Located North-East of Australia, the Solomon Islands comprises numerous islands including Guadalcanal, the site of bitter fighting between Japanese and US troops, in which the US was ultimately and decisively victorious.

### **Reverse**

Various views of the Statue of Liberty - close up with arm raised, medium view with torch held high, upper body with elaborate pleats and tablet of laws as seen from the Statue's right - in 3D relief with different frosted finishes on proof-quality mirror background.

Incidentally, 2016 sees the 130<sup>th</sup> birthday of the Statue, which was dedicated October 28, 1886. It's also 240 years since the Declaration of Independence was signed – 1776 – which is the date inscribed on the *tabula ansata* – the votive tablet held by Lady Liberty.

### **The PAMP Production Process**

The Lady Liberty series coins were minted in accordance with PAMP's very high level of production with exacting quality standards.

The minting process includes the following:

- metal strips in highest quality gold are prepared
- coin blanks are cut from these strips
- each blank is carefully washed and polished
- the highest quality mirror surface blanks are selected prior to the minting process.

Each blank is manually and individually struck 3 times to get a highly defined, high quality result.

Prior to inserting the coins into their CertiPAMP (tamper-evident packaging & certificate), the PAMP Quality Control team check each piece to make sure that only the highest quality pieces are packed for distribution.

### **Specifications**

Metal	Fine Gold
Fineness	999.9
Weight	1/4 Troy oz.
Diameter	22mm.
Depth	1.06mm.
Quality	Proof
Edge	Reeded

### **Packaging**

Each coin is sealed inside a 'CertiPAMP' container (similar to packaging for PAMP-produced gold bars). The packaging shows the Statue design on one side, while on the other is a Certificate Number,

a statement of metal fineness, weight, and quality, together with the PAMP hallmark and the signature of the independent assayers accredited by the Swiss Federal Bureau for the Control of Precious Metals (Assayer Fondeur). A PAMP plastic box is available that holds 25 of the coins, while individual coins can be supplied with an elegant black card box shown below.

Here are some more views of the coins, showing the stylish CertiPAMP packaging.

Marin Aleksov, CEO and founder of Rosland Capital, told me how

much he appreciates PAMP's fine work. As he put it, "PAMP is known in our industry to have the highest standards, and from our experience we can say their customer service, with MTB playing a central role, is also exceptional".

How's that for a customer testimonial?
